

Question 4

Which of the following is a characteristic of a function that is continuous and differentiable at a point? Select all that apply.

A. The function has a unique tangent line at that point.

B. The function is defined at that point.

Question 5

Which of the following is a characteristic of a function that is continuous and differentiable at a point? Select all that apply.

A. The function has a unique tangent line at that point.

B. The function is defined at that point.

Question 6

Which of the following is a characteristic of a function that is continuous and differentiable at a point? Select all that apply.

A. The function has a unique tangent line at that point.

B. The function is defined at that point.

Question 7

Which of the following is a characteristic of a function that is continuous and differentiable at a point? Select all that apply.

8. Question 2 is not applicable: This question is not applicable (NJ Department of Education, Office of Assessment – [ESSA ELL Entry and Exit Guidance](#), p. 4).

Which of the following is a characteristic of a function that is continuous and differentiable at a point?
