Freedom Is A Fraud

Foreigners think the US is free

But what they don't know is it cost a fee

Not with the money we make

But with the things they take

Oh, we just wanna be free

People should not be scared to walk outside

And think oh thank goodness I didn't die

The time a man was choked to death for a \$20 crime

Should be written in the books for murder

And to Breanna Taylor we heard her

Loud and clear

We're just sorry her neighbors' walls got justice before she did

And to this day we wait for the police to stand up

And do their time for their committed crime

What happened to the time when America's greatest activist said these words?

" We hold these truths to be self- evident that all men are created equal,"

All men are created equal

Those five words

Should stick to us like glue

Yet the police act like they have no clue

The words of the wise should be taken into consideration

Not drifted away like evaporation

All these black women and men should not have to fight for the freedom they deserved 57 years ago
when segregation.
