

Olga Hugelmeyer
Superintendent of Schools

January 23, 2019

Dear Parents and Guardians:

Elizabeth Public Schools works hard to ensure that students and team members are provided a safe and caring learning environment for all to perform at their best.

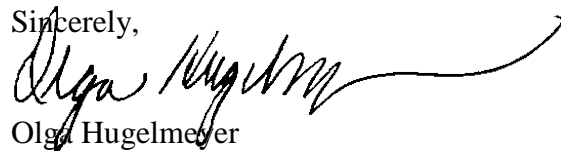

Last night, due to the impact of freezing temperatures, a boiler at Mabel G. Holmes School No. 5 shut down, causing a heating issue. A maintenance crew from the Elizabeth Public Schools Division of Plant, Property, and Equipment was deployed this morning at 6:30 a.m. to the school and the issue was corrected, restoring heat to normal flow.

We will continue to monitor the temperature of the building throughout the day in the effort to ensure that all students and team members are comfortably participating in school activities.

The safety of our children and team members and communicating issues pertaining to their safety in a timely manner will always remain top priorities.

Thank you for your continued support of Elizabeth Public Schools.

Sincerely,

Olga Hugelmeyer

Office of the Superintendent of Schools
