BOARD OF EDUCATION

RESOLUTION

WEEK OF RESPECT

WHEREAS, the Anti-Bullying Bill of Rights, Assembly Bill 3466, was approved by the New Jersey Legislature in November 2010 and signed into law as P.L. 2010, c. 122, by Governor Chris Christie on January 5, 2011; and

WHEREAS, the statute is intended to protect students from harassment and intimidation that would substantially interfere with their education; and

WHEREAS, in a 2009 survey by the National Centers for Disease Control, one in five New Jersey students indicated they had been the subject of bullying on school grounds during the previous year; and

WHEREAS, the Anti-Bullying Bill of Rights places expanded responsibilities on teachers, school administrators and boards of education to protect students from incidents of bullying, harassment and intimidation; and

WHEREAS, the Anti-Bullying Bill of Rights designates the week beginning with the first Monday in October as “Week of Respect” throughout New Jersey”; and

WHEREAS, the law directs school districts to observe the “Week of Respect” through age-appropriate instruction in accordance with New Jersey’s core curriculum content standards; and

WHEREAS, the Elizabeth Board of Education recognizes the harmful impact of harassment and bullying on children and is committed to providing all of its students with warm, safe learning environments free from intimidation; and

WHEREAS, the Elizabeth Board of Education supports the intent of the Anti-Bullying Bill of Rights to protect our children, as well as the goal of previous law to enhance training and instruction to prevent harassment, intimidation and bullying.

NOW, THEREFORE, BE IT RESOLVED, that the Elizabeth Board of Education declares October 3-8, 2022 as a “Week of Respect” in all district schools.

BE IT FURTHER RESOLVED, that the Week of Respect will be a part of the Elizabeth Public Schools’ ongoing efforts to foster respect among students and staff for the diverse cultures and personalities represented in our school community, and that the resolution be spread on the official agenda of the Elizabeth Board of Education.

Y**BOARD OF EDUCATION****RESOLUTION****A PROCLAMATION ON THE DEATH OF QUEEN ELIZABETH II**

WHEREAS, the following proclamation was issued by United States of America President Joe Biden on September 8, 2022, in response to the death of Queen Elizabeth II:

Her Majesty Queen Elizabeth II was more than a monarch. She defined an era.

In a world of constant change, she was a steadying presence and a source of comfort and pride for generations of Britons, including many who have never known their country without her. Queen Elizabeth II led always with grace, an unwavering commitment to duty, and the incomparable power of her example. She was a stateswoman of unmatched dignity and constancy who deepened the bedrock Alliance between the United Kingdom and the United States. She helped make our relationship special. The seven decades of her history-making reign bore witness to an age of unprecedented human advancement and the forward march of human dignity. Her legacy will loom large in the pages of British history, and in the story of our world.

As a mark of respect for the memory of Queen Elizabeth II, by the authority vested in me as President of the United States by the Constitution and the laws of the United States of America, I hereby order that the flag of the United States shall be flown at half-staff at the White House and upon all public buildings and grounds, at all military posts and naval stations, and on all naval vessels of the Federal Government in the District of Columbia and throughout the United States and its Territories and possessions until sunset, on the day of interment. I also direct that the flag shall be flown at half-staff for the same length of time at all United States embassies, legations, consular offices, and other facilities abroad, including all military facilities and naval vessels and stations.

IN WITNESS WHEREOF, I have hereunto set my hand this eighth day of September, in the year of our Lord two thousand twenty-two, and of the Independence of the United States of America the two hundred and forty-seventh.

Joseph R. Biden, Jr.

NOW, THEREFORE, BE IT RESOLVED, that in honoring the proclamation of the President of the United States and in respecting the memory of Queen Elizabeth II, Elizabeth Public Schools flew the flag of the United States at half-staff at all district sites on September 19, 2022, the day of interment, and

BE IT FURTHER RESOLVED, that the resolution be spread on the official minutes of the Board of Education.

BOARD OF EDUCATION

RESOLUTION

RECOMMENDED: That the following revised policy be adopted:

6142.10 Policy Internet Safety and Technology

INTERNET SAFETY AND TECHNOLOGY

The board shall develop a technology plan that effectively uses electronic communication to advance and promote learning and teaching. This system of technology shall be used to provide local, statewide, national and global communications opportunities for staff and students. Educational technology shall be infused into the district curriculum to maximize student achievement of New Jersey Student Learning Standards.

It is the policy of the district to establish safe and effective methods for student and staff users of the district's technological resources and to:

- A. Prevent user access over its computer network to, or transmission of, inappropriate material via Internet, electronic mail, or other forms of direct electronic communications.
- B. Prevent unauthorized access and other unlawful online activity.
- C. Prevent unauthorized online disclosure, use, or dissemination of personal identification information of minors; and
- D. Comply with the Children's Internet Protection Act (CIPA).

The district shall ensure equal and bias-free access for all students to computers, computer classes, career and technical education programs, and technologically advanced instructional assistance, regardless of race, creed, color, national origin, ancestry, age, marital status, affectional/sexual orientation, gender, religion, disability, English proficiency, immigration status, housing status or socioeconomic status.

The district has worked consistently to create a technological foundation that provides equal access to all technology to all staff and students. This ongoing work sets the procedures and protocols needed to eliminate any downtime to ensure success in a hybrid learning environment. The district has provided all students in Grades Pre-K through Grade 12 with their own device in preparation for the remote learning environment. All students in Elizabeth Public Schools will now have their own device. Each device is assigned to a specific student and is to be used ONLY by the assigned student. Devices are never shared. All students in the district will be bringing their assigned devices back and forth from home to school to allow for equal technology accessibility both at school and in the home.

For the reasons set forth below, students and teachers must use their district-issued device in order to safely and effectively access our digital learning platform. Those who use personal devices for off-campus work will not have the same range of access as those using district-issued devices. Students have access to a variety of software to use on their district-issued devices. Our online learning environment is facilitated through the Microsoft Office 365 Suite for Education. Students can use the Office 365 Suite to produce word processing documents, spreadsheets, and presentations via

INTERNET SAFETY TECHNOLOGY (continued)

PowerPoint. Students may receive their lessons and class materials and communicate virtually with their class and teacher via Microsoft Teams and PowerSchool Schoology. Online programs including Language Arts, Math, Science, Reading, Social Studies, and Pre-Calculus Online are accessible to all staff and students. These resources are very vital tools used to supplement and complement curriculum content virtually.

All student devices are set up to automatically contact the district's next generation firewalls when used outside of the school network. When devices connect to the district's next generation firewalls the devices are protected exactly as they are when used on the district network. This ensures that all devices when used off campus are kept safe from malware attacks, viruses, and inappropriate content. Devices also will be preinstalled with an antivirus software that ties into our next generation firewall to extend the power of the next generation firewall to the endpoints themselves and maintain a safe virtual environment for our students.

COMPLIANCE WITH CIPA

Filters Blocking Access to Inappropriate Material

To the extent practical, technology protection measures (or "Internet filters") shall be used to block or filter Internet, or other forms of electronic communications, access to inappropriate information.

Specifically, as required by the Children's Internet Protection Act, blocking shall be applied to visual depictions of material deemed obscene or child pornography, or to any material deemed harmful to minors.

Subject to staff supervision, technology protection measures may be disabled or, in the case of minors, minimized only for bona fide research or other lawful purposes.

Inappropriate Network Usage

To the extent practical, steps shall be taken to promote the safety and security of users of the school district online computer network when using electronic mail, chat rooms, instant messaging, and other forms of direct electronic communications.

Specifically, as required by the Children's Internet Protection Act, prevention of inappropriate network usage includes:

- A. Unauthorized access, including so-called "hacking," and other unlawful activities; and
- B. Unauthorized disclosure, use, and dissemination of personal identification information regarding minors.

INTERNET SAFETY TECHNOLOGY (continued)

Education, Supervision and Monitoring

It shall be the responsibility of all members of the school district staff to educate, supervise and monitor usage of the online computer network and access to the Internet in accordance with this policy and the Children's Internet protection Act. Procedures for the disabling or otherwise modifying any technology protection measures shall be the responsibility of the chief school administrator or his or her designee.

The chief school administrator or his or her designee shall ensure that students and staff who use the school internet facilities receive appropriate training including the following:

- A. The district established standards for the acceptable use of the internet;
- B. Internet safety rules;
- C. Rules for limited supervised access to and appropriate behavioral expectations for use of online resources, social network websites, and chat rooms;
- D. Cyberbullying (board policy 5131.1 Harassment, Intimidation and Bullying) awareness and response.

Student use of the Internet shall be supervised by qualified staff.

Policy Development

The district Internet Safety and Technology policy shall be adopted and revised through a procedure that includes reasonable public notice and at least one public hearing.

ACCEPTABLE USE OF THE INTERNET

Purpose

To support its commitment to providing avenues of access to the universe of information available, the district's system of electronic communication shall include access to the Internet for students and staff.

Limitation of Liability

The Internet constitutes an unregulated collection of resources that changes constantly, so it is not possible to totally predict or control the resources that users may locate. The board cannot guarantee the accuracy of the information or the appropriateness of materials that a user may encounter. Furthermore, the board shall not be responsible for any damage users may suffer, including but not limited to, loss of data or interruptions of service. Nor shall the board be responsible for financial obligations arising through the unauthorized use of the system.

INTERNET SAFETY TECHNOLOGY (continued)

District Rights and Responsibilities

The computer system is the property of the district, and all computer software and hardware belong to it. Therefore, the district retains the right to monitor all access to and use of the Internet.

The board designates the chief school administrator as the coordinator of the district system. He/she shall recommend to the board of education qualified staff persons to ensure provision of individual and class accounts necessary for access to the Internet, designation of quotas for disk usage on the system, establishment of a document retention schedule, establishment of a virus protection process and coordination of other activities as required to maintain the system.

Each principal shall coordinate the district system in his/her building by approving all activities for that building; ensuring that teachers receive proper training in the use of the system; ensuring that students are adequately supervised when using the system; maintaining executed user agreements; and interpreting this acceptable use policy at the building level.

Access to the System

This acceptable use policy shall govern all use of the system. Sanctions for student misuse of the system shall be included in the disciplinary code for students, as set out in regulations for policy 5131 Conduct/Discipline. Employee misuse may result in appropriate discipline in accord with the collective bargaining agreement and applicable laws and regulations.

This policy shall be read and implemented in conjunction with the district's policy Staff Use of Internet, Social Networks and Other Forms of Electronic Communication file code 4119.26/4219.26.

The board shall ensure the acquisition and installation of blocking/filtering software to deny access to certain areas of the Internet.

World Wide Web

All students and employees of the board shall have access to the Web through the district's networked or stand alone computers. An agreement (shall/shall not) be required. To deny a child access, parents/ guardians must notify the building principal in writing.

Classroom E-mail Accounts

Students in grades K-8 shall be granted e-mail access through classroom accounts only. To deny a child access to a classroom account, parents/guardians must notify the building principal in writing.

INTERNET SAFETY TECHNOLOGY (continued)

Individual E-mail Accounts for Students

Students in grades K-8 may have individual accounts at the request of teachers and with the consent of parents/guardians. An individual account for any such student shall require an agreement signed by the student and his/her parent/guardian.

Students in grades 9-12 may be granted individual e-mail accounts and dial-up access to the system. An agreement shall be required for an individual e-mail account and must be signed by the student and his/her parent/guardian.

Individual E-mail Accounts for District Employees

District employees shall be provided with email access. Access to the system will be provided for staff members who have signed the acceptable use policy agreement. Email will be monitored and archived for three years. Employee email is discoverable and will be released if subpoenaed within the archival period set forth in this policy.

District Web Site

The board authorizes the chief school administrator to establish and maintain a district web site. The purpose of the web site will be to inform the district educational community of district programs, policies and practices.

Individual schools and classes may also establish web sites that include information on the activities of that school or class. The building principal shall oversee these web sites.

The chief school administrator shall publish and disseminate guidelines on acceptable material for these web sites. The chief school administrator shall also ensure that district and school web sites do not disclose personally identifiable information about students without prior written consent from parents/guardians. Consent shall be obtained on the form developed by the state department of education. "Personally identifiable information" refers to student names, photos, addresses, e-mail addresses, phone numbers and locations and times of class trips.

Parental Notification and Responsibility

The chief school administrator shall ensure that parents/guardians are notified about the district network and the rules governing its use. Parents/guardians shall sign an agreement to allow their child(ren) to have an individual account. Parents/guardians who do not wish their child(ren) to have access to the Internet must notify the principal in writing.

Acceptable Use

All users are responsible for appropriate use of the district's technological resources, which include the computer network, computer labs, hardware peripherals, audio-visual systems, digital boards, communication systems, databases, etc.

INTERNET SAFETY TECHNOLOGY (continued)

Student Safety Practices

Students shall not post personal contact information about themselves or others. Nor shall students engage in any kind of personal contact with individuals they meet online. Attempts at contact from such individuals shall be reported immediately to the staff person monitoring that child's access to the Internet. Personal contact information includes but is not limited to names, home/school/work addresses, telephone numbers, or personal photographs.

Use of Personal Electronic Communication

Users must register personally owned computers and personal devices used on school grounds with the Office of Technology and Information Systems prior to connection of any such computer or device to the district network.

Any computer or electronic device connecting to the EBOE network may do so only through an encrypted connection with approved and updated anti-virus and/or security software installed. Computers or other devices not meeting these requirements may be restricted from the network.

All computers and personal electronic devices owned by individual members of the community and used on school grounds are subject to this policy.

Prohibited Activities

Users shall not attempt to gain unauthorized access (hacking) to the district system or to any other computer system through the district system, nor shall they go beyond their authorized access. This includes attempting to log in through another individual's account or accessing another's files.

Users shall not deliberately attempt to disrupt the district's computer system performance or destroy data by spreading computer viruses, worms, "Trojan Horses," trap door program codes or any similar product that can damage computer systems, firewalls, servers or network systems.

Users shall not use the district system to engage in illegal activities.

Users shall not access material that is profane or obscene, that advocates illegal acts, or that advocates violence or hate. Inadvertent access to such material should be reported immediately to the supervising staff person.

Users shall not plagiarize material that is available on the Internet. Plagiarism is presenting another's ideas/words as one's own.

Users shall not infringe on copyrighted material and shall follow all dictates of copyright law and the applicable policies of this district.

INTERNET SAFETY TECHNOLOGY (continued)

Prohibited Language

Prohibited language applies to public messages, private messages, and material posted on web pages.

Users shall not send or receive messages that contain obscene, profane, lewd, vulgar, rude, inflammatory, or threatening language.

Users shall not use the system to spread messages that can reasonably be interpreted as harassing, discriminatory or defamatory.

System Security

All adults/staff users of district login credentials and computers must utilize the MFA authentication process and have their own unique password which may not be shared with anyone but the Office of Technology and Information Systems. Multi-factor Authentication (MFA) is an authentication method that requires the user to provide two or more verification factors to gain access to a resource such as an application, online account, or a VPN. MFA is a core component of a strong identity and access management policy. Rather than just asking for a username and password, MFA requires one or more additional verification factors, which decreases the likelihood of a successful cyber-attack or a Ransomware malicious infection.

Users are responsible for their accounts and should take all reasonable precautions to prevent unauthorized access to them. In no case should a user provide his/her password to another individual.

Users shall immediately notify the supervising staff person or the Office of Technology and Information Systems if they detect a possible security problem. Users shall not access the system solely for the purpose of searching for security problems.

Users shall not install or download software or other applications without permission of the Office of Technology and Technology Systems.

Users shall follow all district virus protection procedures when installing or downloading approved software.

All computer terminals must be locked or logged off when away from desks during the day and logged off each night.

System Limits

Users shall access the system only for educational, professional or career development activities. This applies to discussion group mail lists, instant message services and participation in Internet "chat room" conversations.

Users shall check e-mail frequently, archive old messages routinely, and delete messages promptly.

INTERNET SAFETY TECHNOLOGY (continued)Privacy Rights

Users shall respect the privacy of messages that they receive and refrain from reposting messages without the approval of the sender.

Users shall not publish private information about another individual.

District databases that secure information about academic life, community members, and school business are the property of the district. Information contained therein is confidential and can neither be distributed nor used for personal gain. The district reserves the right to restrict access to such databases.

School Furnished Electronic Devices

The district may furnish students electronic devices such as laptop computers, tablets, notebooks, cellular telephones, or other electronic devices. When a student is furnished with an electronic device the district shall provide the student with written or electronic notification that the electronic device may record or collect information on the student's activity or the student's use of the device if the electronic device is equipped with a camera, global positioning system, or other feature capable of recording or collecting information on the student's activity or use of the device. The notification shall also include a statement that the district shall not use any of the capabilities in a manner that would violate the privacy rights of the student or any individual residing with the student. The parent or guardian of the student furnished an electronic device shall acknowledge receipt of the notification. The district shall retain the acknowledgement as long as the student retains the use of the electronic device.

Failure to provide the required notification shall be subject to a fine of \$250 per student, per incident. If imposed, the fine shall be remitted to the Department of Education, and shall be deposited in a fund that shall be used to provide laptop or other portable computer equipment to at-risk students.

Implementation

The chief school administrator may prepare regulations to implement this policy.
